

Kwik-Wall is committed to green manufacturing, LEED and sustainability. Recyclable materials used in the construction of Kwik-Wall products will reduce end of project recycling rates. Four raw materials make up approximately 95% of our product offering:

- Steel
- Aluminum
- Glass
- Gypsum

Kwik Wall buys its materials from manufactures within 500 miles of our manufacturing facility in Springfield, Illinois. The aluminum, steel and gypsum used in our wall systems come from either Indiana or Tennessee. The vinyl products we use come from a plant in North Carolina and are made with recycled materials.

The vendors we purchase from:

Kentland, IN 47951

Majority of aluminum extrusions that Kwik-Wall uses come from above location.

Carthage, TN 37030

850 Hinged Pair, 850 Multi Directional and 850 Heavy Duty track come from above location.

Elkhart, IN 46515 & Shoals, Indiana 47581

We purchase US Gypsum Drywall through Patrick Industries. Drywall is drop shipped from Indiana.

Production Fabricating & Stamping (Metal Parts)

South Chicago Heights, IL 60411

Chicago Heights, IL 60411

Steel for panel frames

Riverdale, IL 60827

Steel for panel frames

Kwik-Wall focuses on recycling and reducing the following items in our manufacturing process.

- Wood
- Plastics
- Shipping materials
- Carpet, vinyl and Fabric
- Cardboard

Percentage of Recycle Goods

35% Steel - made with 85% recycled goods

50% Post Consumer

50% Post Industrial

35% Aluminum – made with 55% recycled material

0% Post Consumer

55% Post Industrial

25% Gypsum – made with:

100% recycled paper

5% Post Consumer

95% Post Industrial

95% Natural gypsum rock

5% Post Consumer

0% Post Industrial

US Green Buildings Council's LEED Rating

4.1 & 4.2 Credit Recycled materials

5.1 Credit Local/Regional materials

Summary

Kwik-Wall made with over all ratios:

15% Post Consumer

33% Post Industrial

At Kwik-Wall's facility our recycle percentages of manufacturing waste are:

100 % of all vinyl and carpet wall covering

90% of all cardboard

95% of all aluminum and steel

If you have any more questions about our efforts in green manufacturing let me know.
